

I very stongly feel that telemarketers are invading my privacy. I pay to have my phone number unlisted and my phone numbers gets sold to the telemarkers. I am a nurse and I am mandated at times to work 18-19 hour shifts only to be awakened by nonsense phone calls from the telemarketers. I can not turn my phone off because of my children or in case of emergencies. I do not and will not do business over the phone. When a telemarketer calls me on a Saturday and is told I am not interested in their services they will again call me on Wednesday for the same nonsense. If I didn't want it on Saturday, I sure as hell don't want it on the following Wednesday. I am starting to recognize the same voices and this is very frustrating and upsetting. I DO NOT WANT TELEMARKETING CALLS TO MY HOME, ESPECIALLY WHILE WE ARE EATING SUPPER.
